Airheads Xtremes Rolls	Non chocolate Candy	2	50	100	5.99	11.98	15	85	$ 0.25	$ 21.25

How to use this chart:
Calculate the candy and snacks you purchase at Sam's Club in "pieces" or "eaches".
> If you buy 2 boxes of 90ct Airheads bars you have purchased 180 "pieces": enter this in "Total Pieces".
> "Cost" is what you paid for the candy. 2 90ct Airheads boxes cost $7.99 each at Sam's Club.
> "Remaining Quantity" is the product left over at the end of the day.
> " Pieces Sold" is the difference between what you bought and what is left over.
> " Sell Price" is what you are selling the product for.
> " Revenue" is a calculation of the Quantity Sold multiplied by the Sell Price.

Notes:
