## Construction begins late May

The project will provide a new center turn lane on State Highway 21 between Technology and Surprise Way, providing safe turning movements for residents entering and exiting their neighborhoods on this busy stretch of highway.

- **Construction will begin late May** on the south side of the highway. When paving is complete, traffic will shift to the new pavement as crews complete the widening on the north side of the highway. Work is scheduled for completion in late July.
- The anticipated work **schedule is Monday-Friday, 7 am to 7 pm**. Motorists can expect reduced speeds through the construction zone; traffic shifts and periodic delays with flagger control.
- Access will be maintained to all neighborhoods throughout construction.

**Motorists are encouraged to slow down and drive with caution through construction zones.**
