

# INSTRUCTIONS – HOW TO UPDATE YOUR EVENT ROSTER

If you have any questions or problems with registration, contact [support@usyouthsoccer.org](mailto:support@usyouthsoccer.org)

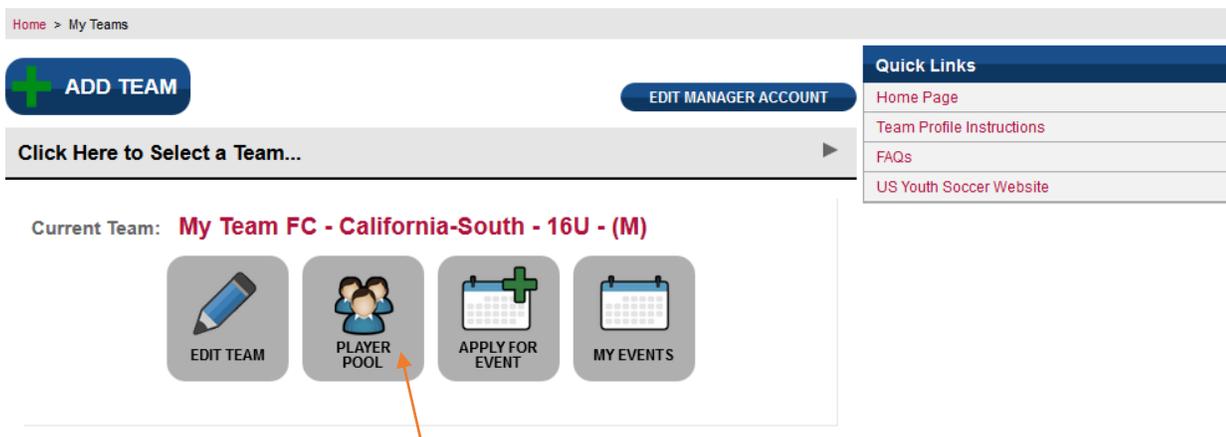

**LOG IN:** <http://tournaments.usyouthsoccer.org/members/login.aspx>

---

**STEP 1.** If you are adding a player to your roster, you must first add the player to your Player Pool.  
(If you are only removing players or adjusting jersey numbers, you can proceed to Step 2)

---

Select your team from the dropdown menu. From your Selected Team page, click on the **PLAYER POOL** button.

## ON YOUR PLAYER POOL PAGE...

Here you can add players, view players or edit your pool of players. (**First and Last names must match what is on the State Roster. Do not use nicknames. The player registration number is the state issued ID number listed on a player card.**)

To make updates to your player pool, you can edit player information individually by clicking the **pencil icon** next to the player, or you can click **Export Pool** and make changes to the pool in excel then import the updated document.

**\*\*NOTE: This pool of players is different from an event roster, which is accessed within the National League event in the system.**

---

**STEP 2.** Access your Event Roster to add/remove players from the active roster and/or update jersey numbers and position information.

---

After you add player(s) and update your player pool, you will be able to click on the **MY EVENTS** button to begin entering your event information and event roster.
