

Athlete Incident Management System

Powered by InjureFree

What it is:

- One location for coach/parent compliance training and education
 - State mandated concussion education content
 - Federally mandated Safe Sport training
 - Customizable to include heat illness, sudden cardiac arrest, etc...
- Centralized database to transfer “medical status” of athletes
 - Update digital player cards with connection to registration system
 - Keep coaches in team management platform
 - Authorize participation in state level tournaments, ODP, etc...
- FREE service for members of US Youth Soccer to digitize reporting
- Incident documentation for anyone you authorize to use
- Private and Secure
- Real-time notifications reducing legal and medical costs through streamlined communication
- Mobile, real-time incident documentation, reporting and tracking tool
 - Streamline RTP paperwork
 - Maintain records for insurance/legal claims
 - Reduce deposition fees with secure database of organization files
- Providing families with injury management information/regional healthcare options
- Increasing the sponsorship/fundraising potential for US Youth Soccer and individual state associations
- Leading U.S. youth sports in standard of care for injured athletes
- Laying the foundation for reducing participation costs for families and increasing participation

What it is not:

- Not an App
- Not a cookie-cutter approach to sponsors; able to customize for each state association
- Not an Electronic Medical Record (EMR); While Maintaining Priority on Security of Information
- Not exposing/selling user information
- Not for injury diagnosis
- Not used by doctors
- Not mandatory for Organization Members to utilize/adopt
